

## The Bradford Point Vision Statement

*(What Bradford Point Is and What It Should Be)*

Bradford Point is sculpted out of a heavily wooded 43 acre peninsula on Big Saint Germain Lake. The 52 condominium units are enveloped by century old pines, beautifully preserved wetlands and the overall pristine natural surroundings of Wisconsin's North Woods. It represents the finest development of its type because it is located in the heart of unquestionably the most desirable vacationland in Wisconsin and the entire Midwest.

Bradford Point was created to provide all owners with the finest in maintenance free modern condominium style living at an affordable monthly cost. In exchange, owners are imposed with only a few restrictions on what they and their guests are not permitted to do thereby insuring the continuity of the entire development while providing a relaxing and peaceful environment for all to enjoy. Bradford Point, simply put, is the finest development of its kind. Consequently, it is imperative that its total value be preserved. Every owner must do their part by sharing in the responsibility for the necessary care, appearance, concern and well being of the entire development as if it were entirely their own.
